

Useful Tools

Vscode Extensions:

1. Live server -> auto updates your webpage on save
2. HTML Boilerplate -> HTML snippet generator

Websites:

1. <https://css-tricks.com/> -> very good guide on flexbox/grid
2. MDN docs -> info on css rules/html tags... and almost everything
3. Flexbox froggy - a fun game to learn flexbox properties

Application: Digital Colour Meter (Mac built in) -> to pick out colour from a static picture, very useful for assignment 1!!

Keyboard shortcut: Command/control + M + W -> wrap a text inside a HTML tag, you can even add class/id etc (more on this [here](#))
